EDUCATION

University of Massachusetts Amherst Amherst, MA
College of Social & Behavioral Science
Bachelor of Science in Resource Economics *Candidate: December 2027*
Minor: *Environmental Science*

- Cumulative GPA: 3.7; Dean's List All Semesters

Relevant Coursework: *GIS Mapping (Graduate Level), Computer Mapping, AI Literacy in Economics, Statistics/Price Theory, Economics in Public Policy, Computing: Foundations to Frontiers,*

SKILLS

Data Analysis: High Proficiency in Excel (financial modeling, pivot tables, regression analysis), Python, SAS, Microsoft Access
Geospatial Analysis: ArcGIS, QGIS, Adobe Illustrator (Map Editing)
Other: Microsoft Word, PowerPoint

RESEARCH

Natural Resource Policy & Administration Amherst, MA

- Directed legislative research done for State Senator John Velis' Office on regulatory use of UAVs in environmental protection, security and privacy, and critical infrastructure
- Compiled, cleaned, and analyzed environmental and land-use legislation across all 50 states; building a structured Excel database categorizing laws by legislative goals to support technical and policy analysis
- Authored a 6-page policy report summarizing findings, identifying key regulatory issues and offering recommendations, demonstrating strong technical writing and report preparation skills

EXPERIENCE

Gather New Haven New Haven, CT
Environmental Field Instructor & Educator *June 2024 – August 2026*

- Conducted water quality monitoring of various sites along Long Island Sound and New Haven Harbor, testing for nitrogen and other pollution indicators, evaluating impacts on marine ecosystems relative to environmental standards
- Preformed field sampling and fish population surveys using seining techniques; logged and interpreted data on size and condition for site assessment reports
- Designed and delivered a peer mentorship/training pipeline, developing upper-class high schoolers for future field education roles
- Served as lead field instructor and site coordinator for a 20+ youth program for ages 13-16, overseeing daily field logistics, equipment and staff supervision

Massachusetts Men's Rowing Association Amherst, MA
Vice President | Captain *August 2025 - Present*

- Manage team operations, managing travel logistics, regatta scheduling, and equipment resources across two facilities for a 40+ member collegiate program
- Maintain comprehensive inventory systems for boats, ergs, oars, and team gear; manage damage reporting, equipment repair coordination, and facility assignments
- Coordinate fundraising campaigns generating $100,000+ in revenue, including the team's first marathon fundraiser ($6,000+) and an alumni donor-matching initiative ($25,000)
- Balance 20+ hours/week of collegiate athletic training with full academic workload and organizational leadership responsibilities

Central Connecticut Rowing Middletown, CT
Assistant Coach *May 2026 – August 2026*

- Design and execute training plans for master's rowers, including experienced and inexperienced with the sport
- Provide on-water support by leading practice and providing frequent feedback

National Marine Fisheries Service New Haven, CT
Shellfish Research Associate *August 2023 – June 2024*

- Conducted quantitative analysis of biological datasets to identify seasonal drivers of Blue Mussel mortality in Long Island Sound by compiling and modeling organism growth and environmental data in Excel
- Built and maintained time-series datasets tracking growth and mortality trends, improving research insights by performing data cleaning, regression analysis, and data visualization using Excel charts and summary metrics
- Collected and analyzed environmental and biological data across a 10-month monitoring period through daily organism counts, bi-weekly measurements, and monthly biomass sampling
- Conducted daily water quality testing including pH and salinity analysis using various laboratory instruments
